X-Ray and Dental Combined

GoDR Vet Combines X-Ray with Dental X-Ray allowing for easy patient managment in an all-in-one system. Meaning less time switching through and transfering information from multiple programs.
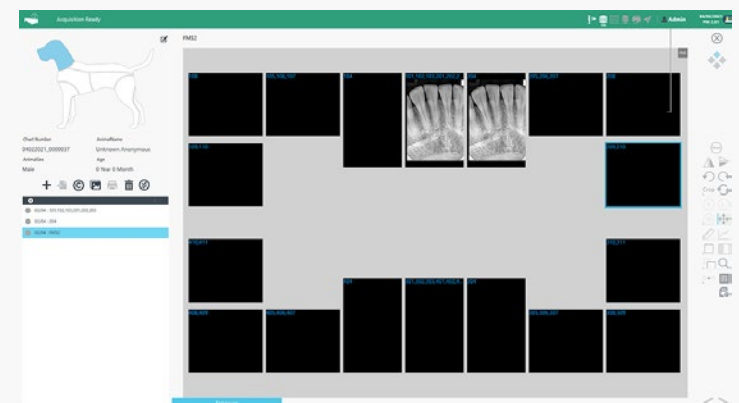

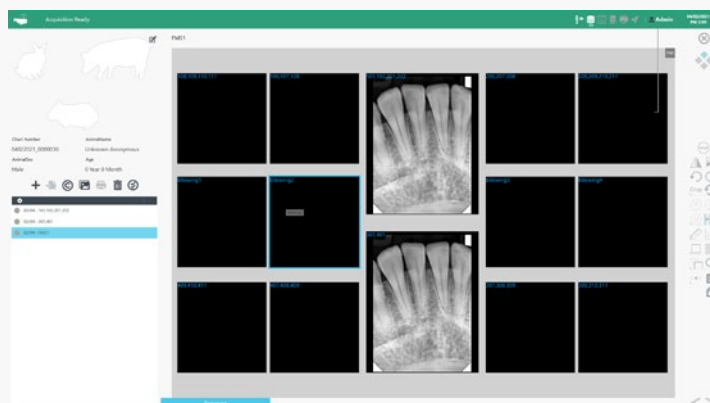

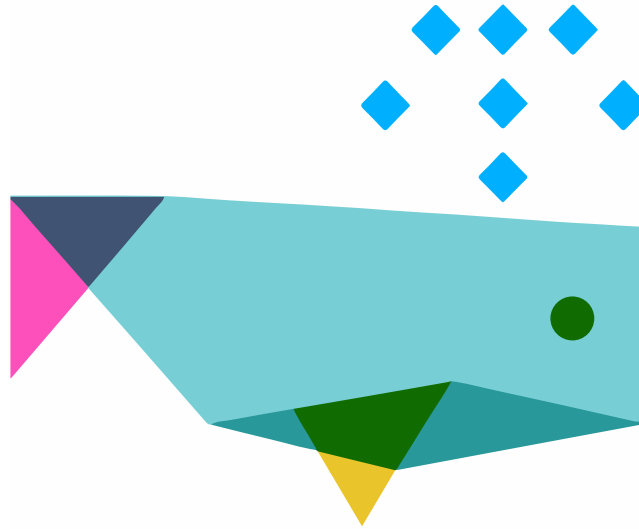

Dental Tooth Picker

GoDR Vet utilises a simple tooth picker graphical interface to help the user manage and collate dental x-ray images for each patient. This can be applied for almost any animal whether its a canine, feline, equine or rabbit.
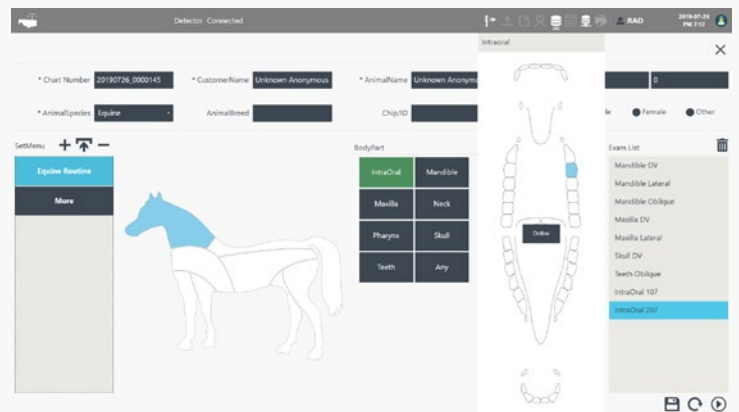

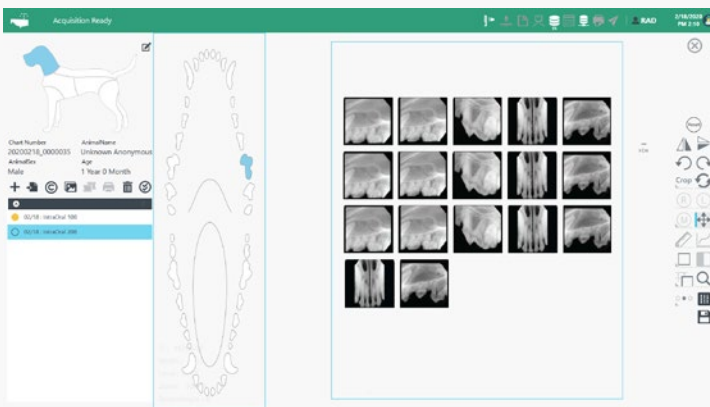

Full Mouth Series Display

The Full Mouth Series Display feature allows the user to see all dental x-rays taken for the one patient and arranges them in an easy to view dental structure. This helps the user to visualise which x-ray belongs to which tooth.
