

## Legacy Pet Care

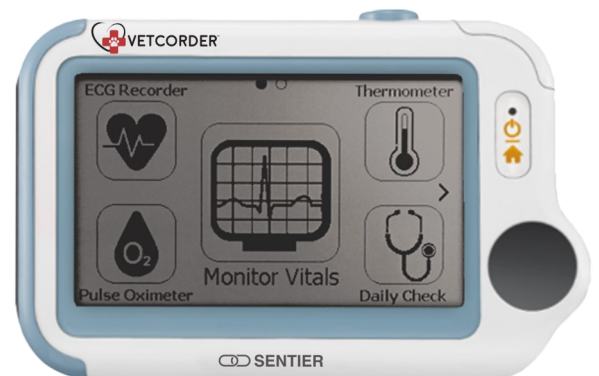

The team at Legacy Pet Care are headed up by Dr Annette Miller who started the centre in 1996. Legacy Pet Care has been an integral part of the local community for years. In that time, we've helped thousands of our clients cats & dogs, rabbits & guinea pigs, birds, horses and even a few snakes.

### The Challenge

With the care of the animals at the core of their mission and providing the best quality care, the team at Legacy Pet Care wanted to monitor their patients the whole time during their visit. They wanted a portable solution that would easily be accommodated within a cage or with the patient.

### Our Solution

Working to understand Legacy Pet Care's needs, ARO suggested the Sentier Vetcorder™ Classic which offers an alternative to outdated, high cost and bulky monitors. As a portable smart monitor, it stays with your patient from admission through to discharge.

### What the Client Said

Annette Miller, Vet and Owner at Legacy Pet Care explained after doing lots of research, he was convinced that the Vetcorder™ Classic would be ideal for their practice in assisting to monitoring animals in the hospital or on oxygen.

"In fact, we have only had it a month and already it has been sensitive to pick up a cardiac arrest of a cat in recovery. We are even thinking of getting another, because for the price, it is legendary."
